

2017 ONSHORE ASSET MANAGEMENT

Smart Asset Management in a Mature Market

Lift your Onshore Wind Farm Operational and Financial Performance

RenewableUK presents a premier event dedicated to onshore wind asset management.

We're bringing together asset owners and managers; O&M, legal, finance, and insurance specialists; investors; energy storage companies, and external sector experts to discuss ways to maximise the yield and market performance of the UK's 13GW onshore wind asset base.

- Learn how owners are rethinking asset management
- Manage wind farms as turbines come out of warranty
- Find new technologies to maximize market opportunity

Attendees will benefit from the opportunity to meet key players, learn about current progress, get insight into future trends and opportunities, and fast track their learning on cost reduction so that it can be applied to new wind energy schemes.

Onshore wind has proven itself as a reliable technology, and the UK market is a mature one. With older onshore wind schemes now starting to come out of their warranty contracts, the conference includes detailed content on improving O&M and management regimes; and how asset owners are beginning to think through life extensions, re-contracting, repowering and refinancing to help improve long term performance.

Attendees will also learn how new technologies like digitization, smarter data use, drones, and co-located storage can be adopted by owners to increase the performance and income of wind farm assets.

Who should attend

Onshore wind asset owners, operators, and O&M specialists. Those who want to break into the sector and understand the opportunities, government departments and regulators, and any others who wish to learn about the role of asset management in the maturing onshore wind marketplace.

Promote your company

Book space to build your company's profile in asset management. You will gain excellent connections and exposure in this increasingly important part of the onshore wind industry.

Exhibition space is very limited. To learn more and reserve your stand contact David Moyle on 0207 901 3011 (david.moyle@renewableuk.com) Alternatively visit www.events.renewableuk.com

Knowledge:

- Business leaders perspective
- Recent developments, and lessons learnt
- External sector knowledge applied to onshore wind
- O&M cost reduction, new technology and techniques
- Using digital tools and energy storage to maximize performance

Networking:

- Focused access to asset management experts
- RenewableUK Connect Networking Reception

Business Development:

- Determine how your company can best contribute to asset management
- Exhibit to showcase your capabilities and products
- Find new partners
