Overview

With the increasing size of wind farms, turbines, and structures, UK's ports and vessels are thinking about their future requirements and what it will look like to support the next generation of wind farms. Collaboration and open discussions across the whole value chain is crucial in order to develop at the pace necessary.

Why attend?

RenewableUK's new Ports & Vessels webinar series provides a platform for ports, project developers, vessels owners and supply chain to collaborate, lesson share and address key industry barriers to future offshore wind construction and support.

Headline Sponsor (All 4 webinars)

£6,000

- Exclusive membership of the headline sponsor steering group
- Steering group to agree the themes and topics of the webinars through scheduled meetings with the RUK team.
- Shape the programme and networking engagement.
- High visibility sponsor branding
- Thought leadership - sponsor to showcase expertise in webinar panel
- All sessions recorded and available on-demand.

Event Sponsor (Single webinar of your choice)

£2,000

- High visibility sponsor branding
- Company logo embedded into all event collateral alongside the other sponsors
- Thought leadership - speaker & chairing opportunities
- All sessions recorded and available on-demand.

Overview

To further decarbonisation, a collaborative approach between wind and aviation is crucial. Following two successful years of workshop- style discussions, RenewableUK's Wind and Aviation event is moving to a webinars series, where we will be bringing together key stakeholders and industry experts to discuss potential challenges, suggest practical solutions and ways forward, whilst also realising opportunities from collaborative, cross-sector thinking. Broken down by topic, audience members will be able to engage with thematic discussions relevant to their area of interest and take away clear resolutions.

Why attend?

Wind and Aviation will be bringing together key decision makers, thought-leaders and experts from the wind and aviation industries to the latest strategic questions; collaboratively seeking new solutions as well as sharing lessons learned, key stakeholder updates, and new industry initiatives and innovations.

Headline Sponsor (All 4 webinars)

£5,000

- Exclusive membership of the headline sponsor steering group
- Steering group to agree the themes and topics of the webinars through scheduled meetings with the RUK team.
- Shape the programme and networking engagement.

ONSHORE WIND ENERGY

Webinar Series | May - June 2021

▶ #RUKOnshore21

FREE TO
ATTEND

Overview

In the run up to Onshore Wind Energy 2021, RenewableUK will be hosting three online webinar's delivering technical, financial and innovative strategies on how to increase the performance of your onshore wind assets and maximise your portfolio's revenue. The perfect way to prepare for RenewableUK's annual Onshore Wind Energy event, happening Autumn 2021.

Why attend?

- Drop in and focus on your favourite topics. These webinars are targeted and focussed sessions, making the best use of your time and getting straight into the detail
- Hear from data experts and software engineers on the latest innovations improving wind operations
- Discover best practise from developers who have successfully repowered wind sites and built co-located projects, better understand the practicalities and potential opportunities this presents

Strategic Event Partner

£7,000

- The highest-profile support package designed for sector leaders.
- The Event Partner package offers the chance to work closely with RenewableUK to shape the event's key messages and objectives.
- A powerful communication platform targeting policy makers, press and opinion makers before, during and after the event.
- Positioning of your company as an industry thought-leader.
- A strong involvement in shaping the conference programme.
- A set of messages and activities which reinforces the positioning of your brand as a leader in onshore wind.
- Premium branding opportunities.
- A speaking opportunity for a senior representative.
- A customised sponsorship package based on the event partner's communications and marketing priorities.
- Sponsorship includes being Event Partner at the live event and also the Event Partner for the webinar series.

Event Sponsor (Single webinar of your choice)

£2,000

- High visibility sponsor branding
- Company logo embedded into all event collateral alongside the other sponsors
- Thought leadership - speaker & chairing opportunities
- All sessions recorded and available on-demand.

Overview

Achieving net zero relies upon the complete transformation of the current electricity system. By 2030 there will be a significant increase of renewable energy in the system, therefore, new technologies need developing, and new markets need support to maintain a stable grid at the lowest cost to the consumer. The industry is working hard to make this a reality, but what more needs doing before 2030? RenewableUK is excited to announce the launch of the new Future Electricity Systems webinar series as the dedicated platform addressing these hot topics.

Why attend?

- Discover market updates and insights into the UK hydrogen roadmap
- Hear about new technologies providing stability and revolutionising grid system management
- Gain insights from hybrid project developers with real world experience
- Learn about different system benefits of a diverse storage economy
- With dedicated Q&A allotted for each session, engage with our expert speakers, and have your voice heard
